

## How to add and remove Cloud Event organizers

Michael C. - 2024-07-30 - Events & Calendar

Event Organizers allow your organization to provide a point of contact for your events hosted through ClubRunner and allow non-administrators to manage individual events without providing them with a greater level of access than necessary. This allows events to be largely controlled by individual members who have been assigned as an event organizer.

Adding a new Event Organizer

Note

After adding a new event organizer to an event, a confirmation email will be sent to the organizer's provided email address. Future updates to the organizer's **Organizer Role** setting will prompt additional emails to confirm the changes.

1. To access **Cloud Events**, you must go to your website's homepage and log in. [For more information on how to login, click here.](#)
2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
3. Click the **Manage** button on the event you would like to add an organizer to.
4. At the top right of the event page, click **Setup** or the **Gear** icon to begin editing the event.

5. Under the Event Organizers section, click on the **Add** button to open the Add Organizer window, where you may enter the organizer's details.

6. The Add Organizer window will appear, providing several options to configure the

new event organizer:

- **Existing Contact** - Allows you to search and select a member of your organization as the event organizer.
  - **Custom** - Allows you to manually add a non-member as an event organizer by providing their contact details. Non-member organizers are unable to be provided an Organizer role, because they cannot login.
    - **First Name** (Required) - Custom event organizer's first name.
    - **Last Name** (Required) - Custom event organizer's last name.
    - **Email** (Required) - Custom event organizer's email address.
    - **Phone** - Custom event organizer's phone number.
  - **Checkbox to confirm consent** (Required) - Check this to confirm you have the person's consent to add them as an event organizer and to save their information into the system.
  - **Show contact details** - Determines whether an event organizer's contact details will be shared with the public on the event registration page.
  - **Set as Primary Organizer** - Sets the event organizer as the event's default point of contact.
  - **Receive Notifications** - Allows you to customize which event notifications the event organizer will receive.
    - **Successful Registration** - Notifies the organizer about successful registrations.
    - **Ticket Cancellation** - Notifies the organizer about ticket cancellations.
    - **Order Cancellation** - Notifies the organizer about order cancellations.
    - **Refund Issued** - Notifies the organizer about issued refunds.
    - **Payment Received** - Notifies the organizer about received payments.
7. After configuring the new event organizer, click the **Save** button to finalize your changes. Alternatively, click cancel to go back.

Editing an existing Event Organizer

1. To access **Cloud Events**, you must go to your website's homepage and log in. [For more information on how to login, click here.](#)

2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
3. Click the **Manage** button on the event you would like to edit the organizers for.
4. At the top right of the event page, click **Setup** or the **Gear** icon to begin editing the event.
5. Under the Event Organizers section, click on the **dropdown arrow** on the same line as the event organizer.

6. Within the dropdown menu options, click **Edit** button to open the Edit Organizer window.

7. The **Edit Organizer** window will appear where you can make the necessary adjustments. Click the **Save** button to finalize your changes.

#### Removing an Event Organizer

1. To access **Cloud Events**, you must go to your website's homepage and log in. [For more information on how to login, click here.](#)
2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
3. Click the **Manage** button on the event you would like to add an organizer to.
4. At the top right of the event page, click **Setup** or the **Gear** icon.
5. Under the Event Organizers section, click on the **dropdown arrow** on the same line as the event organizer.

6. Within the dropdown menu options, click **Delete** to delete the selected organizer

from the event.

7. A confirmation window will appear. Click **OK** to confirm and remove the organizer.
