Site Pages Widget - Overview & Properties

Zach W. - 2021-03-16 - Website Widgets

The **Site Pages** widget displays Site Pages which are selected to appear on the homepage. Site Pages are subpages of the website which are used inside an individual site typically pertaining to a specific topic. Below are some examples of what the Site Pages Widget would look like on the home page:

The image shows a preview of a website layout. On the left, there is a 'Site Pages' widget with a red border, containing links for 'Our Committees' and 'About Our Club'. Below it is an 'Upcoming Events' widget for a 'Website Webinar' on Jan 08, 2021, from 5:00 PM to 6:00 PM. In the center is a contact block for Rotary with the tagline 'Propelling People Forward', meeting times 'Sundays at 12:00 PM', address '2060 Winston Park Dr, Suite 102, Oakville, ON L6H 5R7, Canada', phone '(123) 456-7890 ext. 000', and email 'purple.metro@example.com'. On the right is a 'Club Calendar' for January 2021, showing a grid of dates with the 7th highlighted.

Site Pages Widget - Properties Overview

Site Pages Widget Properties allows you to change the look of the Site Pages widget. Here you can add a border, change the fonts, and change title/link colours. The Preview window on the right shows the changes that you have made but it does not include your own data.

General section

The general section contains various Border options for the widget.

Show Border: If checked will display a border around the widget, if unchecked there will be no border and the other general field options will not be displayed.

Border Style: Defines the type of border that will be used for this widget.

Border Thickness: Defines how thick to make the border, a setting of 0 will not display a border at all.

Border Color: Defines the color of the border. Click on the **Default** link to set the color

back to the theme default colour.
