

What are Automation tasks?

Mickey D. - 2022-10-21 - Membership Success

Automation tasks are the emails that automatically get sent by the ClubRunner system to all prospective members, these are sent at pre-determined intervals. For example even if the club takes no action, our system can send the prospect an automated email after they fill out the online application, then 3 days after, then 1 week after, then 1 month after and so on. This keeps the prospect engaged during the process. The club can turn this automation on or off.

Each automation task has an email template associated with it. The "3 day" email may offer different information than the "1 week" email.

Note: At this time no new automation tasks can be created by the club, though this is a feature our team is working to introduce in the future.

In the list of automation tasks if you click the **down arrow** icon beside any task, four options appear.

1. **Change Template:** you can edit the associated email template for the task.
2. **History:** if this task has been enabled, this will show its entire history of actions over time.
3. **Make Inactive (or Make Active):** the automation task can be enabled or disabled.
4. **Generate 1 Time:** run this automation task just once, even if it is disabled.

The screenshot displays the ClubRunner interface for managing automation tasks. The top navigation bar includes various menu items like Admin, My ClubRunner, Communication, etc. The left sidebar has a menu with 'Automation Tasks' highlighted in red. The main content area shows a 'Task was enabled' notification and a table of automation tasks. A dropdown menu is open for the first task, showing options: Change Template, History, Make Inactive, and Generate 1 Time.

Name	Last Time Executed On	Last Time Affected Entities	Next Run On	Actions
[To Prospect] Automated Campaign 1 month after	never	N/A	Apr 26, 2022 at 10:00 AM	Active
[To Prospect] Automated Campaign 1 week after	Apr 25, 2022 at 10:00 AM	N/A	N/A	
[To Prospect] Automated Campaign 3 months after	Apr 25, 2022 at 10:00 AM	N/A	N/A
