

## Widgets: RSS

Zach W. - 2021-03-16 - Website Widgets

You use widgets to add content (such as stories, links and upcoming events) to your bulletin or web page. They are essential design features, and each one has a different function. In this article we'll take a closer look at the **RSS** widget. This widget is designed specifically for your organization, and provides links to organization resources online. RSS (or Rich Site Summary) is a family of standard web feed formats used to publish frequently updated information, such blog entries or news. An RSS feed is a benefit to users who want to receive timely updates from several different sites.

1. To access any widget, you need to be logged into your webpage. Then, access the relevant content editor, either for your website or bulletin.

2. Once you have opened the content you wish to edit, you can access the **RSS** widget on the left side of the screen. It is located under the **Bulletin & PR** widget tab.

3. Once in place and published, the **RSS** widget displays a short list of the most recent RSS feed articles and items. By default, each item provided a short summary of the content. Users can click on the title of a given RSS article to view the full content.

### Korean sailor makes waves for End Polio Now

Enjoying calm winds and peaceful Pacific waters, Seung Jin Kim dove off his 43-foot sailboat, the Arapani, to swim with some dolphins nearby. The serenity that day near the equator was a stark contrast to the 60 mph winds and 23-foot waves he had to fight around Cape Horn, the southern tip of South America. But Kim, a veteran sailor and member of the Rotary Club of Seokmun, in Chungcheongnam, Korea, expected such challenges when he set out in mid-October on a 25,600-mile journey around the world. In addition to fulfilling a lifelong dream, Kim is using the trip to raise awareness and funds...

### Monrovia club's Ebola fight not finished

After the first cases of Ebola reached Liberia's capital, Monrovia, last June, local Rotary members feared that the city's limited health care system wouldn't be able to contain the highly infectious, often-deadly disease. Those fears were realized when infections quickly multiplied, underscoring the speed with which Ebola can spread in an urban

4. You have the option to define the source of your RSS feed and how it is displayed. Once you have placed the widget in the content editor, hover your mouse over the widget. Click on the **Pencil** icon when it appears.

5. You now have the option to edit the RSS widget. First, you may change the name of the widget in the **Title** field.

**Edit RSS**

RSS Settings

Title:

URL:   
(example : www.yahoo.com or google.com)

Number of Items to Display:

Show Brief:

Cancel Save

6. In the **URL** field you can change the source of the RSS feed as needed.

**Edit RSS**

RSS Settings

Title:

URL:   
(example : www.yahoo.com or google.com)

Number of Items to Display:

Show Brief:

Cancel Save

7. You can also adjust how the **RSS** widget displays the RSS feed. You can set the number of articles displayed by the widget, and choose whether or not to display a brief summary of the articles, or the full articles. If you uncheck **Show Brief**, the widget will only display title hyperlinks to the relevant content.

**Edit RSS**

RSS Settings

Title:

URL:   
(example: www.yahoo.com or google.com)

Number of Items to Display:

Show Brief:

Cancel **Save**

8. When you are done editing, click **Save**. Or, click **Cancel** to discard your changes.

### Editing Widget Properties

Each widget has a function that permits you to edit the widget properties. Most widgets have standard properties, but some have special rules.

1. To access the widget properties, hover your mouse over the widget once it is in place. Click on the Gear icon when it appears.

2. You may now edit categories under the various headings. Under the **General** category you can edit spacing and border properties for the widget's border.

- **Show Border:** Click this check box if you wish to display a border around the widget.
- **Padding Left:** Enter a value in pixels to set a space to the left of the widget.
- **Padding Right:** Enter a value in pixels to set a space to the right of the widget.
- **Padding Top:** Enter a value in pixels to set a space above the widget.
- **Padding Bottom:** Enter a value in pixels to set a space below the widget.
- **Border Style:** Use this drop-down menu to choose a border style.
- **Border Thickness:** Enter a number to change the border setting. Leave blank to set the default.
- **Border Colour:** Click on the colour choice window to set a border colour.

Padding Right:

Padding Top:

Padding Bottom:

Border Style:

Border Thickness:

Border Colour:  [Default](#)

3. In the section marked **Header Properties** you may customize the appearance of the widget title.

- **Title:** Use this field to enter a new title for the header. This will not change the title of the widget, but rather the heading under which the widget is displayed. You may edit the style and appearance of the text with the format options link to the right of the title field.
- **Show Title:** Uncheck this box if you do not wish to display the title.
- **Font:** Select the font type for the title.
- **Colour:** Select the colour of the title font.
- **Background Colour:** Use this colour selection box to set the background of the font.

Background Colour:  [Default](#)

4. In the **Content Properties** section, you may define the colour of the Speaker link text and any other links.

- **Content Title/Link Colour:** Use this colour selection menu to define the colour of the Speaker link text.
- **Content Background Colour:** Use this colour selection box to set the background colour.
- **Font:** Choose a font to use for content text.
- **Colour:** Select the colour of the content font.

Content Properties

Content Title/Link Colour:  [Default](#)

Content Background Colour:  [Default](#)

Font:

Colour:  [Default](#)

5. In the Settings section you may define the source of your RSS feed and its appearance.

- **RSS URL:** Use this field to define the source of the RSS feed you wish to display.
- **Items to Display:** Enter a number to set the number of items displayed at one time.
- **Widget Refresh Rate:** Set the frequency at which your RSS feed is reloaded and refreshed.

Settings

RSS URL:

Items To Display:

Widget Refresh Rate:  days  hours

6. If you wish to get a sneak peek of your formatting changes, refer to the **Preview** window on the right side of the screen. To see updates, click the **Refresh** button.

**Note:** The Preview button displays placeholder content that reflects your style changes, and not the actual content of your widget.
